Seneca Farewell

Slowly and freely as an air or a lament

Sam Rizzetta © 1988

Variation for measures 15 - 18.

Seneca Rocks, in central West Virigina, is an immense seam of bare rock that juts hundreds of feet into the air. At the top of Seneca Rocks is a huge saddle. In the center of the saddle stood a massive and precariously balanced stone pillar. This prominence, called Princess Rock, was the subject of Indian legend. Without warning Princess Rock fell one day in the 1980’s. “Seneca Farewell” is a lament for Princess Rock and the native Americans of the legends who are also now gone from this land. It is played as a dulcimer solo on the CD Seven Valleys.

Legend has it that an Indian princess frequented the Rocks and was unmatched as a climber. She had many suitors but would not choose. Finally, she declared she would marry the one who was brave enough to follow her to the top of the Rocks. Three were bold enough to risk their lives and follow. But first one fell to his death, and then a second. As the last brave lost his footing and began to fall, she caught his arm and pulled him safely to the top, lest she would have no husband at all.
